Removed bots: none — all 35 of yesterday's folders still present. Status flips: Clipcat 带货爆款 bot green→yellow.

Bot	Disk / prompt change	Status now
code-language-battle-bot	Disk 5.79 → 14.61 MB (+8.82 MB, +152%)	GREEN
Grok Bot	Disk 111.71 → 254.67 MB (+142.96 MB, +128%)	YELLOW

Mission Control	Prompt 227 → 657 chars (+189%)	GREEN
gmail	Prompt 239 → 402 chars (+68%)	GREEN

Thresholds: disk Δ ≥ 5 MB, or ≥ 20% and ≥ 0.5 MB; prompt Δ ≥ 20% (none today). Dormant-bot drops reflect the 2026-10-17 21:31 media quarantine, after yesterday's 21:23 scan.

Dormant 8 — archive & purge status

Bot	Archived / hidden	Media purged	Disk MB (yesterday → today)
browser-finger-fix	NO	yes	0.05 → 0.05
mac mini cleaner	NO	yes	0.05 → 0.05
mainchatpush	NO	yes	0.05 → 0.05

tailnetbot	NO	yes	0.05 → 0.05
just chat bot	NO	yes	0.05 → 0.05
account-manager	NO	yes	0.05 → 0.05
grok-bot-ci-fixer	NO	no	0.05 → 2.86
rea-claude	NO	yes	0.05 → 0.05

Evidence: settings.json has only notifyOnAgentUpdates:true; no archive/hidden key in store metadata; not in deleted-agents.json. Media moved (not deleted) to /workspace/ceo-bot/archived-media/2026-10-17 (43.99 MB, 351 files).

Burn forecast

AWAITING PLAN / USAGE % — the forecast needs the plan name, usage cycle, reset date and latest usage %. All are currently unknown (null); no numbers are invented. Status: awaiting_plan_usage.

Estimated time / token use (relative, ESTIMATE)

Estimated relative load = profile chars × activity factor (dormant 0.2; active 1 + new media files since last audit/10, capped). ESTIMATE ONLY — an index for ranking, not measured tokens or time. No real usage data is available.

Top 5 token-saving recommendations

- Trim the 4 long profiles (Feature Recorder 2378, Grok Bot 1817, Marketing Bot 1394, designbot 1210 chars) to ≤600 chars by moving policy into on-demand skills: they are 28% of all active-bot prompt chars (6799/24592); est. ~4399 chars less loaded per wake across them (estimate)
- Archive the 8 dormant bots in the app — evidence: all 8 folders still present, settings.json only has notifyOnAgentUpdates:true, no archive/hidden key, none in deleted-agents.json; media already quarantined (44.0 MB in archived-media/2026-10-17), so archive is now a zero-risk click
- Prune media on Grok Bot (254.67 MB, 233 attachments, +254.62 MB / 382 files since last audit) and douyin-read-bot (102.97 MB, +102.92 MB): quarantine finished-job attachments to archived-media before they are re-read as context
- Clear find-bot-bot leftover media (14.2 MB, 8 attachments) — a recommender role needs no media context
- Resolve Side Hustle CEO vs Mission Control overlap and set routing boundaries for the 14 new overnight bots (github-issue-report, Clip Bot, 故障风发布片 bot, show-my-numbers, pstack playbook bot, comics-grader, 可修改 AIGC 视频 bot, Proto Bot, dr eggbot, 社媒转发图文 bot, Video Editor, comics-repro-bot, Video Edit Desk, comics-generator) so the router does not wake two specialists for one task
